

PURPLE TO RED IN FIVE STEPS

Under the State's color-coded risk system, moving from purple to red means fewer restrictions. Let's get our County businesses opened by moving into the Red!

JOIN US! Here's what you can do to help our county move from purple to red:

01

TESTING

The more we test, the closer the State moves us to the red tier and the indoor reopening of restaurants, gyms, and places of worship. Testing also detects the virus in people who don't know they have it, which saves lives and ends the pandemic sooner. Find out about free and easy testing at sbcounty19.com.

02

GATHER CAUTIOUSLY

Gatherings of families and friends are by far the leading cause of COVID-19 spread, and that spread is keeping our county in the purple tier. Limiting the size of gatherings, wearing masks, social distancing, and frequent hand washing will help slow the spread and open up the county.

03

COVID COMPLIANCE

Businesses, organizations, and average citizens are working hard and making sacrifices to comply with State health rules. Help the County educate, engage, and enforce by visiting sbcounty19.com.

04

STAY INFORMED

The most reliable and recent information for our county is available at sbcounty19.com, on CountyWire, and on the County's Facebook, Instagram, and Twitter platforms.

05

STAY HEALTHY

Doing what you can to keep yourself and your family physically and emotionally healthy can help ward off sickness and ease recovery. Our county offers endless opportunities for walking, jogging and cycling. A positive attitude during these challenging times is essential to your wellbeing and the wellbeing of those around you.
