Report Name: Data Timeliness Report

Program	1 - 7 days	8-14 days	15 - 21 days	22 - 30 days	31 - 60 days	61 - 90 days	over 90 days
PermanentHousing	11	9	7	7	15	7	19

This report calculates the difference between the program entry date specified for the client and the date the client's application was entered into the system. For example, if a client's Program Entry date of "April 4, 2013" was recorded on April 9, 2013, then the report would calculate a 5 day lag time in recording data. The report groups the number of applications by program and has 7 buckets for the number of days an application has been lagging.
