Point In Time Count – 2023

This is a GIS application that assisted volunteers and staff to perform the homeless point in time count for 2023. Through Survey 123 and ArcGIS, real-time visibility is given to survey collection and is monitored from a centralized operations center. The PIT Plus concept collects any homeless individuals that meets specific criteria where additional resources can be quickly dispatched to them to provide additional assistance.

Short-Term Rental Dashboards

Short term rentals have become a topic of interest in San Bernardino County. GIS dashboards was created to monitor complaints and inspections of short term rental properties.
