SUBJECT: ANNUAL LIQUID WASTE VEHICLE INSPECTIONS

The Division of Environmental Health Services (DEHS) issues annual Health Permits and inspection decals to those who provide liquid waste hauling services within San Bernardino County.

An accurate inventory of all vehicles must be maintained with our office. If you have made any changes to your fleet from last year, please provide that information when you return your invoice for the 2019 calendar year. We can also email your inventory should you request it. You may email: EHS.CustomerService@dph.sbcounty.gov or call our office at 1-800-442-2283 and discuss your fleet changes with fiscal staff.

Permit renewal invoices for your vehicles will be mailed in early December. Please note all vehicles being added to the list for the first time must have their capacity certified with the County of San Bernardino Department of Agriculture Weights and Measures or equivalent.

San Bernardino County Code 33.0850 et seq. is paraphrased to read: "Each permittee shall maintain accurate records and keep them available at the business office of the permittee for inspection by DEHS any time during business hours. The records shall include the location where sanitary wastes are collected; and the type, quantity, and location of all waste discharges made pursuant to the permit for the present and last two calendar years. Such information shall be submitted to DEHS for each month of operation on forms approved or provided by DEHS, by the fifteenth day of the following month." **Failure to provide monthly pumper reports will result in the withholding of the annual decals or other legal action.**

In order to facilitate permit renewal inspections, DEHS is scheduling time at the following centrally located sites to bring your vehicles. EHS staff may schedule other inspection services on a case by case basis. All vehicles must have been inspected by March 1, 2019. Failure to have a vehicle inspected may result in a permit suspension and/or permit revocation hearing.
