

COVID-19 Recommendations for Swimming Pool Users

Do not enter pool/spa area when ill.

Face coverings are required in the swim area, unless you are in the water.

Pool users are encouraged to social distance. Pool users should stay with household members and there should be at least 6 feet between household groups.

Wash hands frequently with soap and water for 20 seconds. Pool users are encouraged to bring their own hand sanitizer that contains 60% or more alcohol. Avoid touching your eyes, nose and mouth.

Reduce capacity to allow swimmers to practice social distancing (excludes same household) while in the water.

Don't share items that are difficult to disinfect (e.g., goggles, nose clips, snorkels, pool noodles, etc.)
