

San Bernardino County SHERIFF'S DEPARTMENT

Speed from Crush Traffic Collision Investigation – Vehicle Dynamics

March 27 – 30, 2023
0700 to 1700 hours

Course Description

"Speed from Crush" builds on collision reconstruction training. Students will determine the speed of vehicles based on damage. Students will be introduced to the principles of the A, B, & G stiffness coefficients, as well as the energy from crush, utilizing a two-, four-, and six-point crush deformation equation. This course will examine crush theory, kinetic energy, delta V and energy from crush.

*****PREREQUISITE*****

MUST HAVE COMPLETED TRAFFIC COLLISION RECONSTRUCTION

Learning Topics

- Elastic and Inelastic collisions
- Angular collisions
- 2-, 4-, and 6-point crush formulas
- Real-world practical application
- AND MUCH MORE

Who Should Attend?

Investigators who are seeking to further their expertise in collision reconstruction as well as build their knowledge in use of the "crush" to determine speeds of vehicles at point of impact.

Frank Bland Regional Training Center

18901 Institution Road

San Bernardino, CA, 92407
